Subscriber Distribution

In-building Cross-connect System Connector (Cont'd)

QBIX1A

A 25-pair distribution connector for single-pair terminations, (one pair in — one pair out). Used to terminate telephone set, feeder and riser cables.

QCBIX2A

A bridging connector with 12 two-pair clips (one pair in — two pairs out). Used to terminate miscellaneous facilities where two multiples are required.

QCBIX5A

A multiplying connector with 5 five-pair clips (one pair in — five pairs out). Used for making multiple connections or terminating tie cables in satellite closets.
